HP3<sup>TM</sup>  
System

## The **HPC<sup>3</sup>**™ System by Barbican, unveiled at NeoCon 2017.

See it live on the **11th Floor, Suite 135.**

The **HPC<sup>3</sup>**™ System is an innovative, ultra high efficiency LED lighting system.

Comprised of straight, curved and corner components, the **HPC<sup>3</sup>**™ is a modular system that offers flexibility with mounting options, creating endless variations that will suit any environment.

Horizontal and vertical components are available in one foot increments up to 10 feet, with specialized connectors between pieces, allowing for extensive runs. Curves and corners allow for creative and dramatic displays that dip under ceiling infrastructure, run parallel to existing piping or change direction from ceiling to wall to floor mounting.

For more information on the ways the **HPC<sup>3</sup>**™ can work in your space, visit us at the Barbican showroom, Suite 135.
